Please refer to the Exstreamer manual
for detailed information.

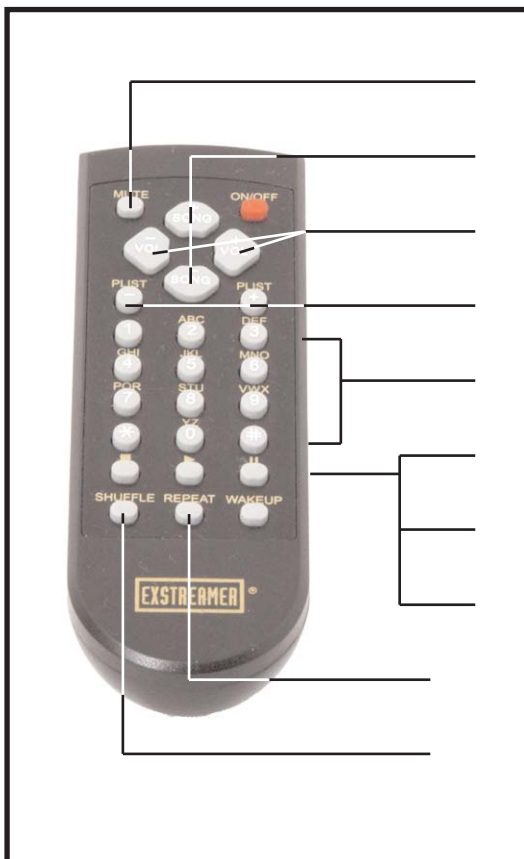

THINK FURTHER

INSTALLATION

- Step 1** Check the firmware version of your Exstreamer under Update. An update is required for Exstreamer running firmware versions lower than 5.19. Download Exstreamer Rescue Kit Version 5.19 or higher from www.exstreamer.com and update the Exstreamer firmware following the instructions in the file readme\st.txt.
- Result** The Exstreamer is ready to support the IR Remote Control Kit.
- Step 2** Open the battery compartment and check the signs of polarity. Insert the two batteries accordingly into the IR remote control.
- Result** The IR remote control is ready to operate.
- Step 3** Connect the serial cable of the IR receiver to the serial port of the Exstreamer. Reinstall the Exstreamer into your installation. Make sure you have line of sight with the IR receiver from where you want to use the IR remote control.
- Result** The Installation is completed. The Exstreamer can now be controlled through your IR remote control. Enjoy the new comfort and ease of use!

GUIDE TO REMOTE CONTROL KEYS
